Product Labeling

Do all hearing aid-compatible handsets include labeling? Yes

Explain:

Do all hearing aid-compatible handsets that are capable of voice communication over any air interface or frequency band that does not have hearing aid compatibility technical standards under ANSI C63.19-2007 include the required language disclosing that the handset has not been rated for hearing aid compatibility with respect to such operations? Yes

Explain:

Do all hearing aid-compatible handsets that the manufacturer also tested and found not to meet hearing aid compatibility requirements under ANSI C63.19-2011 for one or more operations that are not covered under ANSI C63.19-2007, include language informing users by clear and effective means that the handset does not meet the relevant rating or ratings with respect to such operation(s)?

Yes

Explain:

Do all handsets that are capable of use for Voice over LTE, and that were certified for inductive coupling capability under ANSI C63.19-2011 without being tested for inductive coupling capability over VoLTE, include language disclosing that they were not tested with respect to this operation?

Yes

Explain:

Do all handsets that meet the criteria for an M3 rating by allowing the user to reduce the maximum power for GSM operation in the 1900 MHz band include the required disclosure?

Explain:

Public Website

Does your company maintain a public website describing all hearing aid-compatible models, the ratings of those models, and an explanation of the rating system? No

Website address:

Explain: Before Corr Wireless stopped offering handsets in April 2014, the company's public website was <http://www.corrwireless.com/HacInfo.aspx>

Consumer Outreach

Describe consumer outreach efforts in the past 12 months: In 2014 compliant handset models were publicly identified for consumers and audiologists. Compliant models were listed on the company web site and retail salespeople were trained to assist with compliant digital wireless phones. Compliant handsets were available for testing from live phone displays in retail locations. Written materials and promotional literature were provided at the point of sale and on the website addressing the needs of individuals with hearing disabilities. Signage in the retail stores informed customer of the availability of a variety of hearing aid compatible handsets. Customers who used hearing aids were urged to try out a handset before purchasing. Such customers were given a thirty day trial period within which to determine whether the digital wireless phone would work properly with their hearing aids.

Methodology for Functionality Levels

High Tier, highest cost handsets. A very high range of features including megapixel cameras, music player

capabilities, and some with qwerty keyboards and WiFi.

Mid Tier, mid priced handsets with mid range features. All include a camera.

Low Tier, low cost and a basic feature set. Candy bar or basic flip design may include basic VGA camera. No music capabilities.

Report Remarks

In 2014 Corr Wireless Communications, LLC did not operate network facilities utilizing an AWS 700 MHz LTE CDMA or WCDMA air interface.

In September 2013 licenses held by Corr Wireless Communications LLC were acquired by a subsidiary of ATandT pursuant to FCC authorizations. Corr Wireless continued to operate the network and offer wireless devices pursuant to terms of a transition services agreement with an ATandT subsidiary. In April 2014 Corr Wireless stopped offering wireless handset devices. This report lists all handsets offered by Corr Wireless during 2014, namely, from January through April 2014. This is the final Hearing Aid Compatibility Status Report to be filed by Corr Wireless LLC.

You have reported the following handset model summary information.
